Summary

I am a Full Stack Web Developer holding a Bachelor of Law. An innovative problem-solver passionate about developing apps, my current focus is on fast, functional apps.

I bring the following to every project:

Problem-solving skills and perseverance

Dedication to teamwork and flexible collaboration

A foundational knowledge of agile software development principles Strong Work Ethic to get the job done

I'm excited to leverage my skills as part of a fast-paced, quality-driven team. Let's connect!

Experience

Software Engineer

Carina

Dec 2020 - June 2022 (1 year 7 months)

Carina Care matches care providers with care seekers. The company is about 30 employees, with 7 engineers

Worked on creating new dashboards for different administrators in the private care matching system i.e home-care agency administrators and state administrators. I also added new features in both the front-end and back-end in the private care offering. Being on an Agile team, we had daily standup meetings and pair programming to facilitate expeditious delivery of new features and improvements made to them.

- Worked in a React (Typescript), Kotlin Spring Boot, JUnit, and GitHub stack on the core product platform. Also wrote some SQL to query the database.
- Collaborated with Designers, Project Managers, and Engineers to deliver both front-end and back-end features to our child care matchmaking platform. Added the new landing pages and other features for the child care offering.
- Implemented the funnel system for the Washington State Medicare offering i.e the consumer's workflow from when they created their account to when they are matched with a care provider. This funnel involved adding a backend feature that only displayed care providers that were 60 minutes travel time from the consumer, had the specific skills that the consumer preferred and were certified in Washington State.
- Miscellaneous work included: testing, bug fixes, code reviews and documentation.

Learning Assistant- Full Stack Web Development

Trilogy Education

Apr 2021 - May 2022 (1 year 2 months)

Support students with all technologies covered in the curriculum

Resolve students' questions within 30 minutes of being posted

Clearly outline the steps the student should implement themselves to solve the problem

Software Tutor- University of Washington Coding Bootcamp

Trilogy Education

Sep 2020 - May 2022 (1 year 9 months)

Teaching students how to code by breaking down concepts into a granular level for easier understanding.

Mentoring and encouraging students on the right tools to improve their coding skills.

Certified Nursing Assistant

Husky Senior Care LLC May 2020 - Dec 2020 (8 months)
